

Staebel Safemove

Positioning patients can be uncomfortable and awkward for the patient and extremely hard, tiring and heavy work for staff. It can result in potential skin damage to patients and injury risk to staff. However, by placing the Safemove under the patient (breast or pelvic areas), staff can use the straight and/or curved handles to much more easily re-position their patients to line up precisely with the lasers.

Product Benefits:

- No need to manually handle patients
- Reduced risk of tissue damage

Specifications:

Product Code	210317
Width	370 mm
Length	620 mm
